Nota! / Note!

Gli sgabelli ikona sono dotati di ruote per facilitare la movimentazione.
For ease of movement, each piece comes with wheels.

Trattamento superficiale degli elementi in pietra naturale /

Cleaning and maintenance

I nostri sgabelli escono dalla fabbrica già trattati. Poiché non amiamo verniciare con resine o pitture la superficie dei nostri marmi, applichiamo tre strati di sigillante penetrante ad altissimo potere protettivo. In questo modo riusciamo a preservare il prodotto e l'aspetto naturale della pietra.

È necessario ricordare che non esiste un sigillante in commercio in grado di proteggere al 100% la pietra naturale dalle macchie, in particolare se la sostanza penetrante viene lasciata a lungo a contatto con il marmo.

Il sigillante protegge la pietra per qualche minuto dall'attacco dell'agente macchiante (caffè, profumo, ecc.), per cui è necessario rimuoverlo entro pochi minuti per evitare che la macchia si fissi.

Every Ikona stool leaves our factory in Tuscany pre-sealed. Since we do not like to paint the surface of our lovely stone with transparent paints or resins, we apply three coats of the highest possible level of protective penetrating sealant.

This creates a temporary barrier that slows down the absorption into the stone of any staining agents such as coffee, wine, and so on.

That said, please bear in mind that there is no sealer on the market that can make natural stone 100% stain-proof, so we recommend that any potential staining agent is wiped up as soon as possible.

Pulizia quotidiana della pietra naturale / *Everyday cleaning*

Per la pulizia ordinaria delle superfici in pietra, utilizzare sempre saponi o detersivi neutri. Come detersivo neutro Salvatori consiglia FilaBrio. Fare sempre riferimento alle indicazioni riportate sulla confezione del prodotto.

To clean, simply use soap or a neutral detergent such as FilaBrio, always following the instructions provided by the manufacturer.

Nota! / Note!

In nessun caso utilizzare prodotti aggressivi che possano intaccare irrimediabilmente la superficie della pietra, come: alcool, acidi o prodotti anticalcare.

Never use aggressive cleaning products such as acids or limescale removers as these could damage the natural stone.

Manutenzione straordinaria della pietra naturale /

Extraordinary Maintenance

Per la manutenzione straordinaria delle pietre Salvatori consiglia:
PS87 PRO: adatto per ogni pietra, per la pulizia di macchie ostinate e per la manutenzione straordinaria.

FOB XTREME: protettivo neutro a base solvente che protegge senza alterare il colore naturale delle pietre.

STONEPLUS: protettivo rattivante a base solvente consigliato per Pietra d'Avola.

*Where particularly assiduous cleaning or maintenance is required,
Salvatori recommends the following products for use on the stone basin:*

PS87 PRO: for the removal of stubborn stains

FOB XTREME: neutral solvent-based protectant which does not alter the stone's natural colour

STONEPLUS: colour-enhancing, solvent-based protectant recommended for Pietra d'Avola.

Nota! / Note!

Fare sempre riferimento alle indicazioni riportate sulla confezione di ogni prodotto.

Always follow the instructions on the package of any product used.
